

ElderCare+

Complete Mobile App Wireframes

A build-ready, low-fidelity handoff for the complete version 1.0 Android UI: access and linking, older-adult care, family-caregiver management, shared screens, and required state variants.

DELIVERABLE

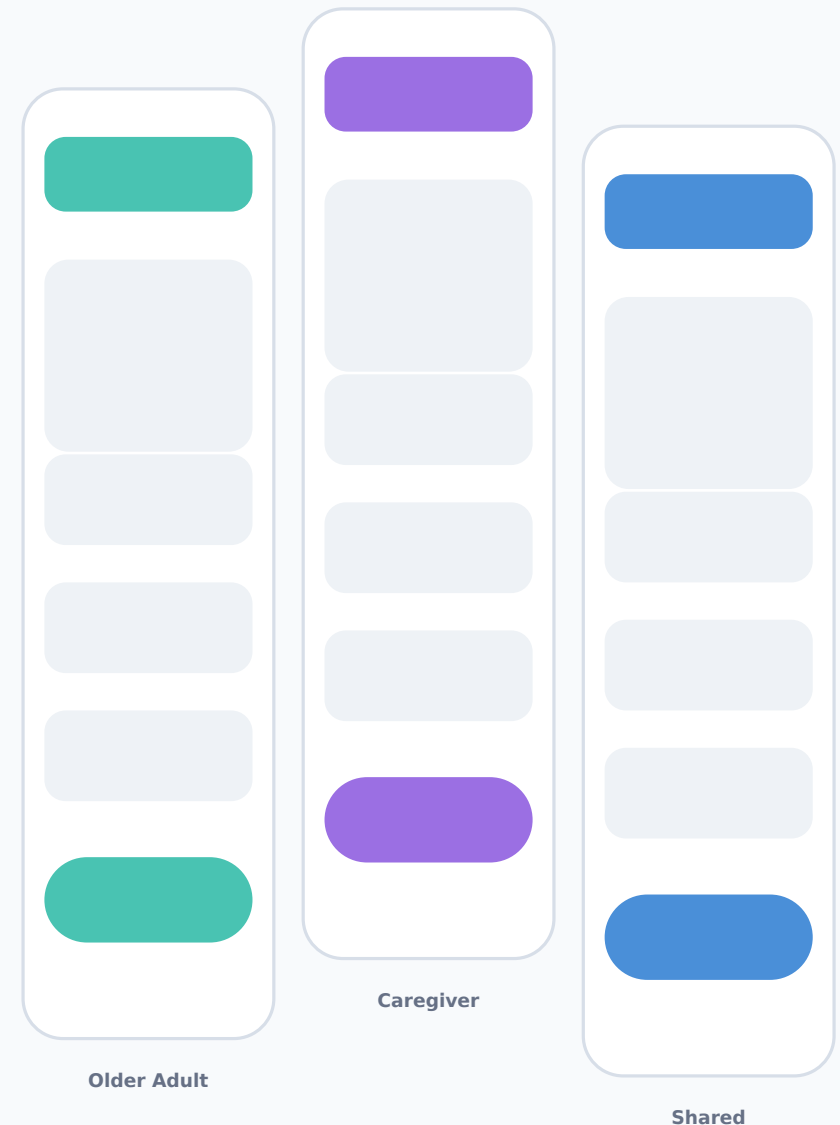

34 full-screen frames + 7 state variants

Base mobile frame: 360 x 800 dp

Roles: Older Adult and Family Caregiver

Version 1.0 - 07 August 2026 - Asia/Manila

Source: approved ElderCare+ System Documentation and User Manual v1.0

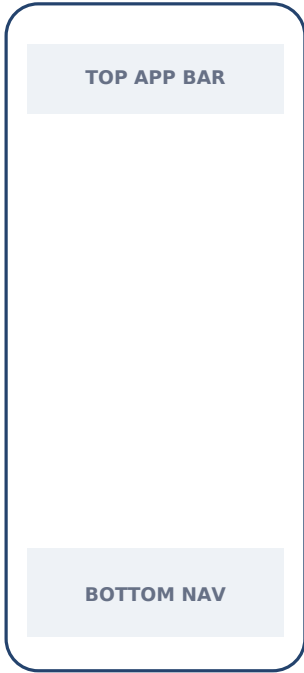

Use this PDF as the visual blueprint for the Figma submission.

Use the screen IDs as the exact Figma frame names. Page references jump you to the wireframe group in this PDF.

Total: 34 full-screen frames + 7 reusable state variants = complete approved scope

1. Mobile frame

360 x 800 dp base frame

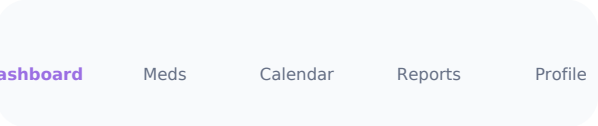

- 8 dp spacing grid
- 48 x 48 dp minimum touch target
- 56 dp elder primary action
- 16-24 dp card radius
- One dominant primary action

2. Role navigation

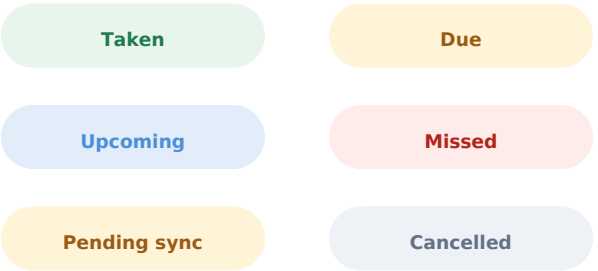

Older Adult

Family Caregiver

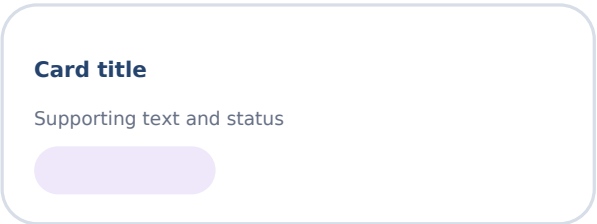

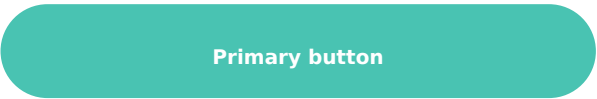

Required status labels

Always pair semantic color with the status word and an icon in the final UI.

3. Reusable components

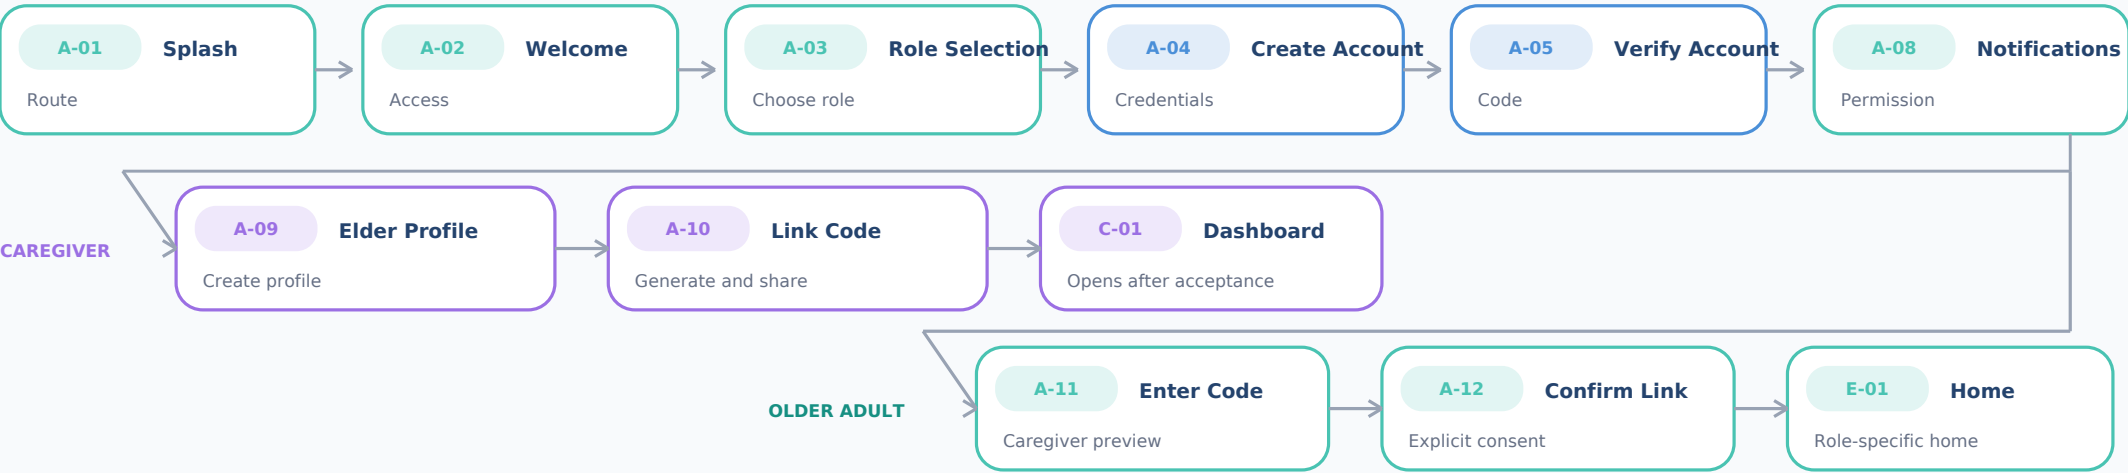

Build these as components with variants:

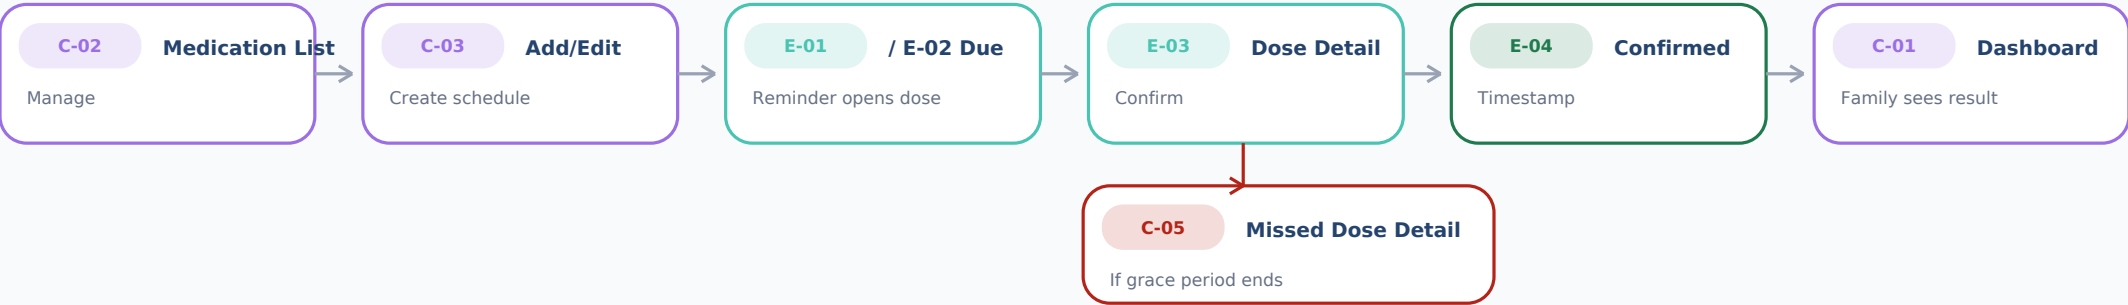

- Buttons
- Bottom navigation
- Fields
- Top app bar
- Medication cards
- Banners
- Appointment cards
- Dialogs / sheets
- Status badges
- Loading skeletons

The flows below cover every interaction required by the approved acceptance checklist.

1. First-run setup and care linking

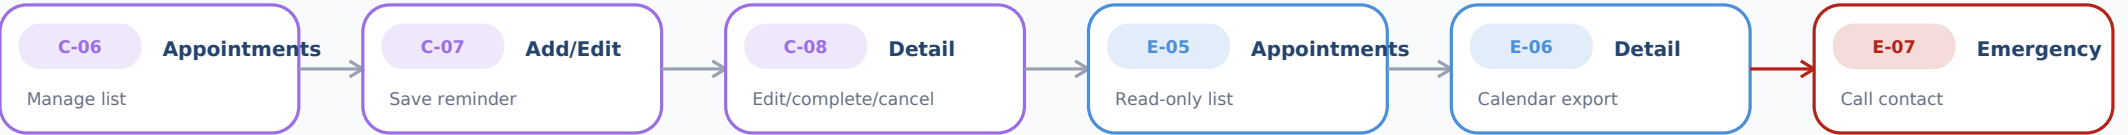

2. Medication adherence loop

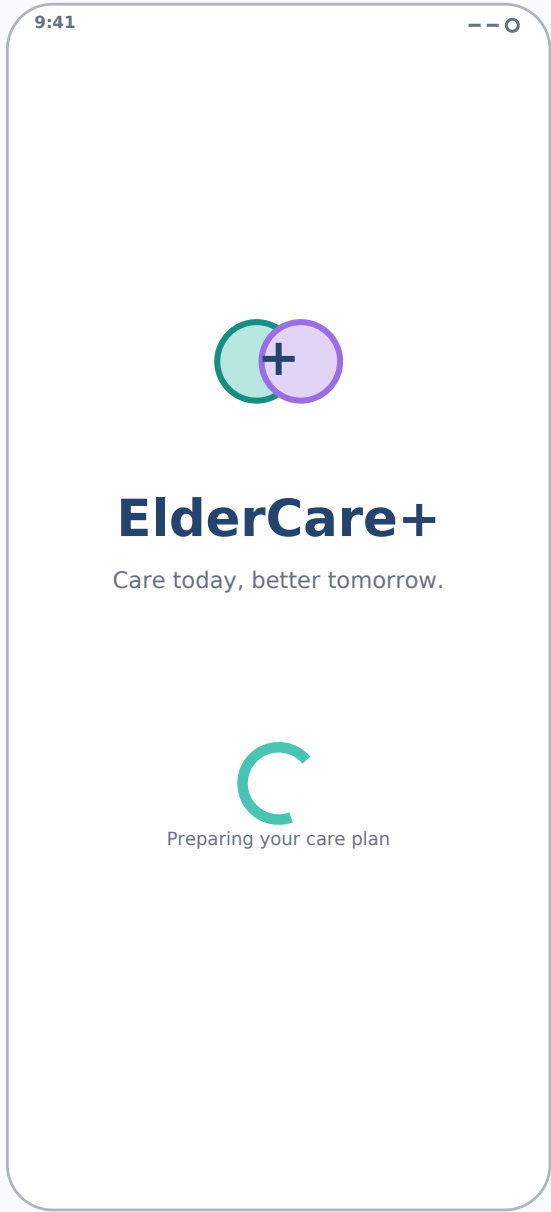

Offline path: E-03 -> V-03 Pending sync -> upload once -> C-01 updates.

3. Appointments and emergency information

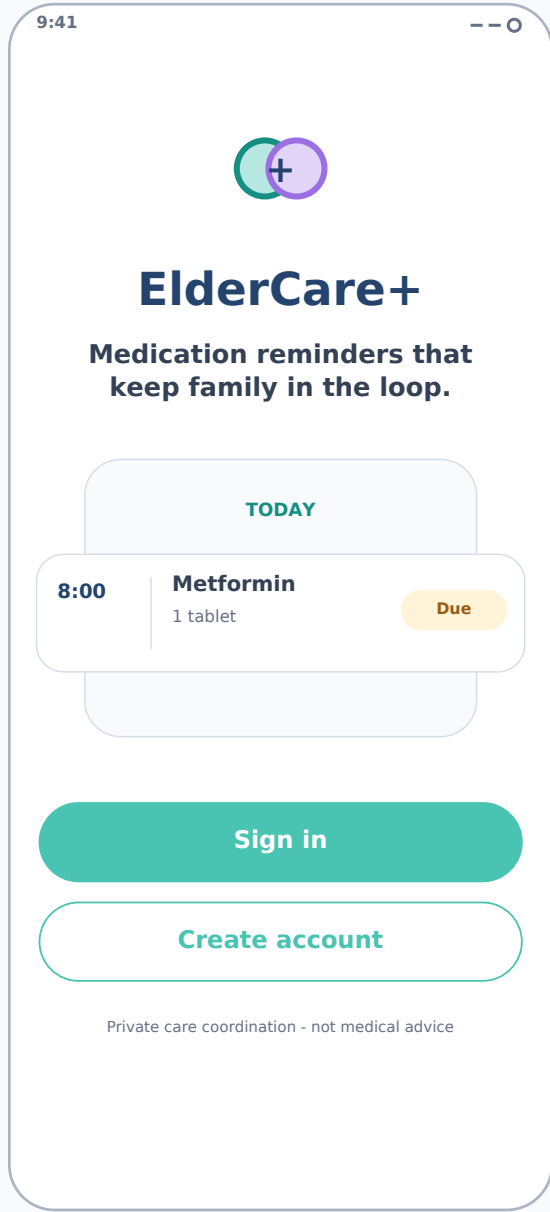

A-01 Splash

BOTH

- PURPOSE**
Route users into the correct authenticated or first-run path.
- PRIMARY ACTION**
[Automatic route](#)
- BUILD NOTES**
- Centered mark and tagline
 - Never leave a blank launch screen

A-02 Welcome

BOTH

- PURPOSE**
Explain the product in one screen and offer account access.
- PRIMARY ACTION**
[Sign in / Create account](#)
- BUILD NOTES**
- No carousel
 - No extra marketing destinations

A-03 Role Selection

9:41

--O

< Choose your role

Select the role that matches what you will do in ElderCare+.

OA

Older Adult

View today's plan and confirm your own medication doses.

Selected

FC

Family Caregiver

Create the care plan, manage appointments and monitor adherence.

Continue

BOTH

- PURPOSE**
Choose one permanent role before account creation.
- PRIMARY ACTION**
Continue
- BUILD NOTES**
- Two large role cards
 - Explain responsibilities in plain language

1. Foundations

- ☒ Create 360 x 800 dp base frames
- ☒ Add approved color and typography styles
- ☒ Use an 8 dp spacing scale
- ☒ Set 48 dp minimum touch targets
- ☒ Use 56 dp older-adult primary actions

2. Components

- ☒ Top app bar and role bottom navigation
- ☒ Primary, outline, text and danger buttons
- ☒ Fields with default, focus and error states
- ☒ Medication and appointment cards
- ☒ Status chips, banners, dialogs and sheets
- ☒ Loading skeleton and empty-state block

3. Screen frames

- ☒ A-01 to A-12: access and linking
- ☒ E-01 to E-08: older-adult experience
- ☒ C-01 to C-11: caregiver experience
- ☒ S-01 to S-03: shared destinations
- ☒ V-01 to V-07: reusable variants
- ☒ Keep exact IDs in every Figma frame name

4. Required prototype paths

Caregiver setup	A-02 -> A-03 -> A-04 -> A-05 -> A-08 -> A-09 -> A-10 -> C-01
Older-adult link	A-02 -> A-03 -> A-04 -> A-05 -> A-08 -> A-11 -> A-12 -> E-01
Medication creation	C-02 -> C-03 -> C-04
Dose confirmation	E-01/E-02 -> E-03 -> E-04 -> C-01/S-01
Missed-dose response	C-01/S-01 -> C-05 -> phone confirmation
Appointment creation	C-06 -> C-07 -> C-08 -> E-05/E-06
Emergency information	E-01/E-07 or C-10 -> E-07 -> call confirmation

Do not add out-of-scope features to the first-quarter submission.

ElderCare+

Instructor Compliance Extension

A companion wireframe pack that preserves version 1.0 and adds only the screens needed for the three-user-level requirement.

COMPLIANCE TARGET

3 distinct user levels

15 dedicated app screens per level

45 role-specific screens total

Extension v1.2 - 08 August 2026 - Asia/Manila

Use together with the unchanged v1.0 wireframe pack.

Older Adult

7 additions

Family Caregiver

4 additions

Connected Family

new read-only level

No original v1.0 screen or page was overwritten.

The count below is deliberately conservative: only screens assigned to one user level count. Access/setup, shared settings and seven reusable state variants remain extra.

Level 1 - Older Adult15

ADDED

E-09 to E-15: history, care-plan summary, preferences, caregiver details and help.

PERMISSION BOUNDARY

Views own plan and confirms own doses. Cannot edit medicines, appointments or another user's account.

Level 2 - Family Caregiver15

ADDED

C-12 to C-15: activity, escalation settings, care-circle management and private export.

PERMISSION BOUNDARY

Maintains one linked elder's plan. Cannot administer unrelated users or system configuration.

Level 3 - Connected Family15

ADDED

F-01 to F-15: consent, read-only care views, family requests, response and availability.

PERMISSION BOUNDARY

Cannot edit care records. May only respond to requests, call contacts and manage personal availability.

Role-model rules

The original 34 full-screen frames and 7 state variants remain valid.

Multiple connected relatives may view approved data and answer family-support requests.

One primary caregiver remains the only family role that edits the elder's care plan.

No chat, payments, location tracking, diagnosis or medication recommendation was added.

Count: F-01 through F-15 = 15 Connected Family Member screens

These routes add a consent-based family care circle while keeping medication and appointment editing under the primary caregiver.

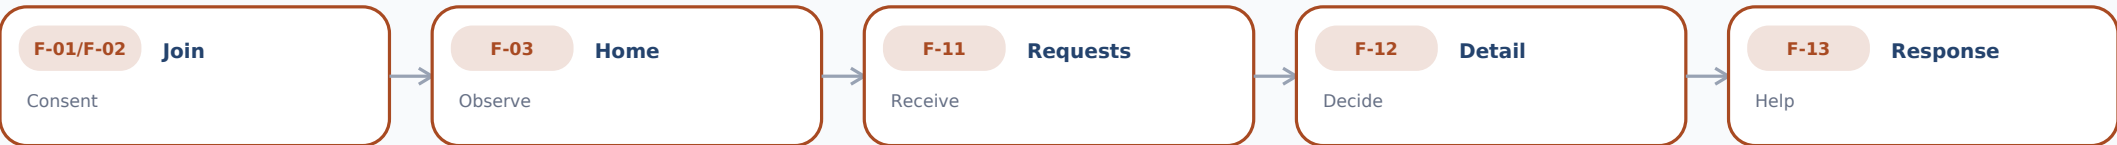

1. Older Adult: ask all relatives or one preferred person

2. Family Caregiver: invite without giving edit rights

3. Connected Family: receive and answer the elder

Family access never permits care-plan edits, dose confirmation or emergency dispatch.

Request Help or Company

9:41

--O

<

Request help

If you are in immediate danger

Call local emergency services or your emergency contact first.

WHAT DO YOU NEED?

Urgent

Practical help

Company

Examples: feeling unwell, household help, a ride, or simply wanting someone to visit.

WHO SHOULD RECEIVE IT?

Everyone available

Choose one person

Optional note

Tell your family what you need

Choose one person opens your family list; only that relative receives the request.

Send help request

This sends a family alert; it does not dispatch emergency services.

OLDER ADULT

PURPOSE
Ask all available relatives or one preferred person for urgent help, practical help, or companionship.

PRIMARY ACTION
Send help request

- BUILD NOTES**
- Specific and broadcast recipients
 - No emergency-service dispatch or medical diagnosis

Home / Care / Requests / Family / Profile

1. Page organization

- ✓ Keep the original Access, Shared and State pages.
- ✓ Extend Older Adult with E-09 to E-15.
- ✓ Extend Caregiver with C-12 to C-15.
- ✓ Create Connected Family with F-01 to F-15.

2. Role separation

- ✓ Give each role its own navigation and entry point.
- ✓ Do not show caregiver editing actions to the elder.
- ✓ Keep all care records read-only for connected family.
- ✓ Let family only respond, call and set availability.

3. Submission proof

- ✓ Older Adult: E-01 through E-15 = 15.
- ✓ Family Caregiver: C-01 through C-15 = 15.
- ✓ Connected Family: F-01 through F-15 = 15.
- ✓ Total dedicated role screens = 45.

Minimal prototype routes

Older Adult	E-01 -> E-14 -> E-15 -> S-01 response status
Caregiver	C-01 -> C-14 -> family invitation; C-12 -> support activity
Connected Family	F-01 -> F-02 -> F-03 -> F-11 -> F-12 -> F-13

Requirement met without counting shared or setup screens.
